

Cybersecurity Audit Certificate

This is to certify that
OQUITY FOUNDATION PTE. LTD.
has successfully completed the initial Smart Contract Audit

Secured
by CyStack

From 18/12/2023 to 29/12/2023, Oquity engaged CyStack to conduct smart contract code review and security analysis. CyStack has analyzed the source code and the implementation of the smart contract on the blockchain network to detect errors and security vulnerabilities, thereby proposing improvements and solutions.

Summarizing the last retest iteration, no known vulnerabilities, which could lead to direct exploitation or system compromise, remain unaddressed by Oquity. Identified issues have been mitigated according to the recommendations provided by CyStack wherever possible.

CyStack further wants to emphasize that the overall security of the system must be rated to be in a good condition. Oquity at all times, has been cooperating with maximum transparency during the various assessment iterations, with all required and requested information delivered in a timely manner, to the full satisfaction of CyStack.

This certificate is issued by CyStack and solely applies to the assessed objects

Vietnam CyStack Joint Stock Company

Nguyen Huu Trung - Chief Executive Officer

Hanoi, 04/01/2024

Disclaimer: Smart Contract Audit only provides findings and recommendations for an exact commitment of a smart contract codebase. The results, hence, are not guaranteed to be accurate outside of the commitment, or after any changes or modifications made to the codebase. The evaluation result does not guarantee the nonexistence of any further findings of security issues.

About CyStack

CyStack is a reputable Vietnamese security provider trusted by many domestic and foreign businesses. The company is a leading expert of blockchain security in the region, providing a large number of security audit projects for blockchain and cryptocurrency, Wallet and D-apps in the area.

The team of experts at CyStack has 8 years of experience in security testing for many large and small projects at local and abroad regions. They are distinguished individuals in the Information Security industry with a wide range of globally recognized research. They are also annual speakers of the world's largest security conferences.
